Report of the Program Advisory Committee

1988-1989

The Program Advisory Committee was established as a single Committee for the 1988-1989 school year. Prior to this, each of the two resource centres had a Program Advisory Committee. The newly constituted Committee consisted of two representatives from each of the four participating provinces, support staff and a chairman who was a member of the Atlantic Provinces Special Education Authority Board of Directors. The major task of the Program Advisory Committee was to make recommendations to the Board regarding program changes and initiatives.

During the year, the Program Advisory Committee reviewed a number of recommendations contained in the Kendall Report. A number of these recommendations were clarified as a result of the deliberations of the Committee.

The Committee reviewed a proposal for the administration of trust funds. The Committee recommended to the Board of Directors that a separate committee be established at each of the resource centres to administer trust funds. Each committee was to consist of the director (or designate) of the resource centre and two or three other members. This recommendation was implemented.

Educational assessment services at the resource centres were considered through discussion papers prepared by the directors of both centres. Discussion on this topic will continue into the 1989-90 school year.

A policy paper entitled "Eligibility for Placement in a Residential Centre Program" was prepared by Program Advisory Committee and recommended for approval to the Board. The Board approved this new policy in June, 1989.

A survey of severely/profoundly multihandicapped children was initiated. A final report should be ready for submission to the Board during the 1989-90 school year.

As chairman, I wish to thank each member of the Program Advisory Committee for their contribution during the year. Appreciation is also extended to staff at the APSEA central office and at the resource centres for their advice and support.

Respectfully submitted,

Parnell Garland

Parnell Garland, Chairman

The Interprovincial School Development Association Committee administers the trust funds of the Atlantic Provinces Resource Centre for the Hearing Handicapped. Applications are reviewed by the committee to provide financial support for recreational, social and cultural activities for hearing impaired youth. Funds are also used for scholarships, graduation awards, prizes and support for research towards development of techniques that would improve the learning of hearing impaired students.

Director's Report

In August, I assumed the position of director of the Resource Centre. Since 1969, when first hired as a teacher of the then Interprovincial School for the Deaf, I have observed numerous changes at the Resource Centre. As the services that we deliver continue to respond to the needs of hearing impaired children, their parents, and the local school districts, the Resource Centre will continue to experience changes.

Marven Spence Memorial Pool

The year has been an eventful one. During the summer of 1988 a new swimming pool was started. The 24 x 36 foot pool, built with Trust Fund money, is an addition to the building between B and C wings. The design of the pool is stepped, rather than sloped. It features a lift, so that paraplegics can enter it, and contains water much warmer than regular pools. Aquatic programs for the students at the Resource Centre were started upon completion of the pool in February, 1989. The therapeutic pool is named in memory of Marven Spence, a former assistant superintendent of the Interprovincial School for the Deaf. Marven, who was hearing impaired, was a student at the Halifax School for the Deaf and graduate of Gallaudet University.

On June 28th, the official pool opening took place. The Minister of Education, Ron Giffin, was in attendance, as well as the APSEA Board of Directors and other special invited guests. Mr. Giffin unveiled the plaque on behalf of the four ministers of education of the Atlantic Provinces.

Staff Development

An advisory group on staff development was formed with their first meeting held on March 1st. The group of representatives of APRCHH staff along with Ruth Kimmins, APSEA Consultant on Staff Development, and myself will meet regularly to study, evaluate, plan and make recommendations pertaining to staff develpment. It was decided that before undertaking a close study of present staff develpment offered at APRCHH and considering any recommendations, the members of the advisory group will be given an opportunity to acquire a sound theatorical base.

Day Class

Before the start of the 1988-89 school year, a decision was made to close a day class housed at the Fredericton High School. Transfer of some students formerly in this class to on-campus programs and the increased demand for support service to students in integrated settings prompted the decision to change the responsibilities of this teaching position from a day class teacher to those of an itinerant teacher.

Labour Management

During the year a labour management committee was formed with representation from the Atlantic Provinces Special Education Authority and membership of the Nova Scotia Government Employees Union. The committee's initial task was the development of terms and conditions covering job sharing arrangements, and an employee assistance program.

Student Protest

On January 25th, a student protest was held by some of the Atlantic Technological Vocational Centre students. This protest created considerable media attention for the Atlantic Provinces Resource Centre for the Hearing Handicapped. The protest of these students was not unlike similar protests that were being held at Gallaudet University, Washington, D.C., and in other provinces across Canada. The issues of increased use of American Sign Language in the schools and more involvement of deaf adults in the education of the deaf were highlighted in the events and media coverage during the early months of 1989.

Homegoing

Throughout the years the Atlantic Provinces Resource Centre has moved to increase the frequency of weekend home goings for the students who atted school on campus in Amherst. In recent years, APRCHH scheduled and met the cost of ten home-goings per school year. For those homegoings weekend, students travelled by public transport or were picked up by parents. For some students, parents assumed the responsibility of the cost of home-going every weekend or every second weekend, in addition to the scheduled long weekends. For other students, home-goings were restricted to those holiday weekends paid by APRCHH. In 1986, a pilot project was initiated to determine the feasibility of transporting students to their homes every weekend. During the first year of operation children

were transported only to the Halifax/Dartmouth area. During this school year home-going was increased to every weekend for certain students and the areas to which students were transported was increased. At the beginning of the school year, 42 students were transported in three runs. One run went to Halifax/South Shore area, one to Truro/Dartmouth and the Valley, and one to Moncton/Sussex/Saint John. Later in the year, three Cumberland County students were transported to their homes, one added to Digby area and in the spring another run added to include students from the Bathurst area. Residence counsellors were responsible for driving and for the supervision on three school buses, a car and one station wagon. Students living on or near van routes were required to go home every weekend. Those families where parents had to drive some distance to meet the school buses had the option of joining the project offered as in previous years. These students were not required to travel home every weekend. Starting in March 1989, departure from the Centre in Amherst was 12:30 pm, allowing all students to be home in the vicinity of 5:30 pm. On Sunday evenings, all students were back to the school by 8:30 pm.

Play Day

On June 8th, the Annual Play Day was held this year. Because of the Centennial Celebrations for the Town of Amherst, a birthday party was held with special events and displays relating to the dress, games and activities of olden days. Despite the rain that carried on for most of the day, the attendance was larger than it has ever been in previous years, and everyone had a great time.

The Fire Alarm System

The main building of the Resource Centre has been equipped with a new fire alarm system. Smoke detectors, new pull switches, and visual signals have been installed throughout the building. The smoke detectors have been extremely sensitive. This condition caused many false alarms during the first year of operation. Students and staff were evacuating the building on numerous occasions and the response by the Amherst Fire Department was of concern, both to the Resource Centre Administration and the Amherst Town Council. The installation of an additional piece of equipment has resolved this problem with the system now functioning and able to provide us with warning of fire and potential fire.

25 Year Awards

The annual Retirement Banquet was held in conjunction with the on campus workshop in May. Marjorie Wells, Chief Housekeeper, retired after 26 years of service.

Twenty-Five Year Awards were presented to David Tingley and Earl Goodwin.

Vocational Assessment - Innovations Project

This pilot project on Vocational Assessment for the Hearing Impaired is funded jointly by the Innovations Program of Employment and Immigration Canada and the Atlantic Provinces Special Education Authority. The project mandate is to implement a model Canadian Assessment Centre which will develop and test the effectiveness of a vocational assessment profile for the deaf and hard of hearing.

The evaluation involves a comprehensive process of work sample assessments interest inventories, and psychometric testing. The individual is led through a process of acquiring information about his/her vocational strengths and weaknesses, interests, skills and aptitudes and is guided in using the information in formulating career plans.

The project began in November 1988 and covers a three year period ending in November 1991. Phase one involved equipping the centre, training staff, establishing intake procedures and preliminary testing. Phase Two and Three will see further testing completed on students enrolled in APRCHH programs with a final report submitted in November 1991.

Co-operative Education Program

A Co-operative Education proposal was accepted by Employment & Immigration Canada under their Canadian Jobs Strategy program. Co-operative Education is an experimental method of learning that is intended to integrate a student's in-school program of study with a community-based training station for learning. This provides students an opportunity to apply classroom theory to a realistic hands-on experience.

The project began in October of 1989 and covers a five year period ending in October 1994. A co-ordinator trainer was appointed and during 1989 fifteen students had 3875 hours of Co-operative Education experience at twenty-eight industries or businesses. The majority of these students were from the APRCHH campus including both academic and vocational students.

Workshops

Two major in-services were held on campus this year. In November, the in-service for on and off campus teaching staff, residence counsellors, teacher aides, and nurses was presented by Linda Franchi and personnel from Cumberland District Family Planning and Family Services offices. The topic covered was 'Child Sexual Abuse'.

The second major workshop was held in May. Dr. Peter Blackwell, Principal of the Rhode Island School for the Deaf spent 3 days at the Resource Centre during which time he met with members of the Program Advisory Committee, APSEA office staff, and the APRCHH administrative team. The workshop sessions, presented to all staff, were concerned with communication with the hearing impaired. Dr. Blackwell spoke on many of the issues facing teachers and administrators in programs for the hearing impaired. The workshop was well received by all staff with many positive comments made during and after the two days.

David Lyon presented a three day workshop during the second week of September at the Newfoundland School for the Deaf. Ear mold theory, modification and practical application were the topics covered. David Lyon, audiologist, Sr. Maria Lawrence, supervisor, Lou Davis and Denise Graham, itinerant teacher, presented a one day workshop to the public school teachers of the Pictou County School Board.

Early in the school year an on campus workshop was held for itinerant teachers from Nova Scotia, and both francophone and anglophone New Brunswick. The workshop covered technological advances in amplification, FM systems, trouble shooting, real ear measurements, and ear mold modification.

Joan Hogan, Parent Educator, gave a workshop to early intervention and kindergarten teachers in Nackawick, New Brunswick.

In October, Myrna Matheson, Acting Supervisor, David Lyon, audiologist and Andre LaFargue, audiologist at the Dr. Everett Chalmers Hospital were presenters at a workshop entitled "Teaching the Hearing Impaired Child". This one-day seminar provided an opportunity for public school teachers to obtain first-hand information and practical experience in the management of hearing impaired children.

The Speech Pathology Department of the Saint John Regional Hospital organized a two day workshop on October 27 and 28. Joan Hogan, Preschool Educator in New Brunswick, and Myrna Matheson, Acting Supervisor in New Brunswick, presented sessions called "Summary of Services Available to Hearing Impaired Children in New Brunswick". Myrna Matheson also chaired the parent panel.

Late in 1988 Stewart Fraser and David Tingley, accompanied by Joan Thompson and her Yarmouth day class, Dawn Hatcher, teacher and four itinerant students from the South Shore, presented a threee hour program on deaf awareness to the Yarmouth School of Nursing.

A number of staff members throughout the year spoke to various university groups, community organizations, schools of nursing, and the Saint Mary's Visual Language Interpreter program providing information on deafness and APRCHH services

A Parent Workshop was held at the Centre in April. A positive response was received from the parents who attended. During the two days presentations were made by APRCHH staff covering the topics of language, discipline and audiology.

Raymond LeBlanc, Academic Supervisor and Dr. Maida Follini, Fearon Department Head gave presentations at the annual meeting of Foster Parents of Canada Organization in Moncton during their May meeting.

On June 4, staff members of the Fearon Unit attended the Canadian Unit of the Deaf-Blind and Rubella Association meeting held in Fredericton. The four staff members gave presentations during the workshop demonstrating speech training material and methods used in teaching language and perceptual skills to deaf-blind students.

An Intervener Training Program was conducted in the Fearon Unit during the month of June. Interveners for several of the deaf-blind students came to Amherst for training.

Annual Medical Report
for 1988-1989

This year the health of the students was generally even better than usual. Fewer patient visits (192) were required, and fewer than average sick days were recorded in the infirmary. This may reflect the fewer days spent at school with the introduction of weekend leave.

In December 1988 Sylvia Keet, Developmental Pediatrican from IWK Hospital, visited and reviewed eleven students from Fearon Unit.

Dr. W. Gill held two conferences concerning behavior modification and medication with one student.

A dental hygienist attended for 2 weeks in November and when needed dental appointments were arranged at Dr. MacLeod's and Dr. MacEachern's offices.

The Saturday ENT Clinic held at the Highland View Regional Hospital Out Patients Department was used very little due to the weekend absence of the students, and it is anticipated that the new ENT surgeon, Dr. Bravo, will be available for weekday consultations for ENT problems in 1990.

Altogether a total of twenty-six students were seen during the year, primarily for gynecology at my office. Students were also seen both in consultation and in my absence at the Out Patient Department of HVRH, courtesy of the Rota System of the General Practitioners. One overnight admission was arranged for observation and one diabetic student attended the Diabetic Clinic.

This low incidence of medical problems in largely attributable to the excellent preventive medicine and early perception of problems provided by the nursing staff with whom I have the pleasure to work.
